- Nutrition Education
- Ophthalmology & Vision Services

Prescription Savings Program

FamilyCare's Prescription Savings Program (Federal 340B Drug Pricing Program) allows us to purchase medications for our patients at discounted prices.

Ask FamilyCare staff about qualifications.

Chronic Care Management

Chronic care management is a voluntary support service that coordinates care for those with chronic conditions.

Patient Portal

The patient portal is an online service provided to all FamilyCare patients. It is a great tool to use to access lab results, request a prescription refill, or schedule an appointment.

Accepted Insurance Plans

Most insurance is accepted, including Medicaid, Medicare, PEIA, CHIP and Tricare.

Payment Assistance

A payment assistance (sliding-fee scale) program, based on income, is available to patients regardless of insurance coverage. Ask to learn more!

Adult Health Care

FamilyCare provides health care for everyone in the family, from newborns to seniors. We offer physicals, vaccinations, health screenings, and testing for illnesses to identify health problems early. We treat minor illnesses and provide care for people with long-term health conditions.

Pediatric Health Care

FamilyCare's pediatric team provides total health care for children. Our services include newborn care, immunizations, regular check-ups, sick visits, physicals, care and referrals for children with disabilities, and vision and hearing screening.

School-Based Health Services

We believe that healthy kids learn better. School-based care is one of the most effective ways to make sure that all students have access to high-quality health care when they need it. We work with schools in Putnam, Kanawha, and Boone counties to offer medical, behavioral health, and dental services to students and faculty.

We offer immediate medical care for accidents or illnesses at our ConvenientCare sites. No appointment is needed and walk-ins are welcome.

From colds to sprains, sports physicals to the flu, we're here to meet the urgent care needs of every member of the family.

Our x-ray/radiology service at our St. Albans location helps us provide complete care to our patients and is an alternative to the emergency room.

Women's Health Care

Our OB/GYN team provides a full range of lifespan care to meet all of your women's health needs. Services include routine gynecologic care and surgery, birth control and family planning, menopause care, health screenings, basic fertility evaluation, and education.

Prenatal Health Care

Throughout your pregnancy, you are treated as an equal partner in your care. Prenatal appointments allow your family to explore the emotional and physical changes that come with pregnancy. We offer physician and nurse-midwife co-management, ultrasounds and other prenatal testing, and childbirth preparation.

Birth Services/Midwifery

Whether you choose to deliver your baby at the FamilyCare OB/GYN & Birth Center or at CAMC Women and Children's Hospital, our certified nurse-midwives and physicians will help guide and support you during this special time. Our team provides epidural anesthesia and non-drug options, such as warm water therapy and one-on-one support, breastfeeding support, and complete postpartum and newborn care.

Our birth center offers a personalized and family-friendly atmosphere for women to give birth and is covered by most major insurance plans, including WV Medicaid.

Dental Care

FamilyCare offers full dental services at an affordable price for children over age three, teens, adults and senior citizens. We provide oral health assessments, cleanings, fluoride treatments, X-rays and sealants.

Our Miles of Smiles Mobile Dental Unit provides dental care for children and adults. The mobile unit visits various FamilyCare sites offering oral health screenings, x-rays, fluoride treatments, cleanings, and sealants.

We accept most dental insurance plans, West Virginia Medicaid and CHIP. People without dental insurance may utilize the payment assistance program, which determines fees based on income.

Behavioral Health, Addictions Treatment, and Social Services

We can help our patients achieve the highest possible level of wellness through services that combine physical care with behavioral health care – mental health, social services, and treatment for addictions.

Nutrition and Diabetes Education

We have a Registered Dietitian Nutritionist (RDN) who provides Medical Nutrition Therapy (MNT), which is covered by most insurance plans.

Our Diabetes Self-Management Education Program (DSME) is the cornerstone of diabetes care and treatment and/or prevention. All age groups are seen and both group and individual sessions are available.

Ophthalmology & Vision Services

FamilyCare offers ophthalmology services to patients from our Ophthalmology and Vision Center located in South Charleston.

Services include exams for dry eye, cataracts, glaucoma, diabetes, macular degeneration, Plaquenil, minor lid procedures, exams for refraction (glasses prescriptions), contact lens fitting, and more!

@FamilyCareWV

FamilyCare is a non-profit community health center and federally qualified health center (FQHC) overseen by a community board of directors.

FamilyCare meets the standards set by the National Committee on Quality Assurance (NCQA) for a patient-centered medical home.

FamilyCare is supported by funds from the U.S. Department of Health and Human Services-Health Resources and Services Administration and by funds from the West Virginia Department of Health and Human Resources.

This health center has federal public health service status with respect to certain health or health-related claims, including medical malpractice claims, for itself and its covered individuals.
